G<sub>1</sub> and G<sub>2</sub> are independently alkyl of 1 to 4 carbon atoms or are together pentamethylene,  
Z<sub>1</sub> and Z<sub>2</sub> are each methyl, or Z<sub>1</sub> and Z<sub>2</sub> together form a linking moiety which may additionally be substituted by an ester, ether, hydroxy, oxo, cyanohydrin, amide, amino, carboxy or urethane group,

where the total charge of cations  $h$  is equal to the total charge of anions  $j$ ; and an organic UV filter selected from

- (c<sub>1</sub>) dibenzoylmethane derivatives;  
(c<sub>2</sub>) cinnamic acid esters;  
(c<sub>3</sub>) camphor derivatives; and  
(c<sub>4</sub>) trianilino-s-triazine derivatives.

The stabilized products are for example skin-care products, hair-care products, dentifrices, cosmetics, laundry detergents and fabric softeners, non-detergent based fabric care products, household cleaners and textile-care products.
